**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent Application JP 2000-070652 to Takemasa et al. Takemasa teaches a refrigerant recovery apparatus (11, FIG. 1) wherein a solid adsorbent (15) is stored in an enclosed container (13) and the inside of this enclosed container (13) is vacuum drawn (Solution). The recovery tank (13) is equipped with a detachable cap (13a) and contains a nonwoven cloth (16), which is used to detain the powdery active carbon (15). Inherently, the fabric, from which the cloth is made of, is finer than a grain diameter of the activated carbon powder. The refrigerant recovery system is connected to a refrigerating circuit (1) via pipe (7), which uses a low boiling point gas refrigerant difluoromethane (Detailed Description).
